FACT SHEET FOR NURSING AND ALLIED HEALTH FORMS

NCC College ID is required

♦ MMR/Meningitis Requirements- New York State Health Law #2165 requires students taking 6 or more credits born on or after 1/1/57 to show proof of immunity to measles, mumps, and rubella. New York State Health Law #2167 requires students taking 6 or more credits to respond to the Meningitis Survey. If your record is not on file from a previous semester, you are required to submit one.

♦ Immunizations & Titers- All first year students are required to submit blood titers for measles (rubeola), mumps, rubella (German measles), and varicella (chicken pox) OR show adequate documentation of immunizations. Lab reports or documentation of immunizations must be submitted as proof of immunity. If blood titers are negative or equivocal and no immunization records are available, vaccinations are required. In addition, a Hepatitis B series (3 doses) or a positive Hep B immune titer is recommended or a Hepatitis B Declination statement must be signed. It is strongly recommended that all students get vaccinated against Hepatitis B.

♦ Physical Exam- Physical exam and tuberculosis testing must be done within 90 days of the first day of class. Physical exams are to be submitted on the official NCC Nursing/Allied Health physical form. PPD skin tests need to be read by licensed professionals only. Students must NOT be cleared until after all tuberculosis testing (PPDs or Quantiferon blood testing) is complete. **The date that you are cleared by your health care professional should be on or after the PPD reading date.

**Please be aware some clinical areas are requesting evidence of a two-step PPD (Mantoux) in the first year of program.** Positive PPD’s or a history of a positive PPD requires Chest X-rays with report attached.

Photocopies of physical are not acceptable. Student Health Services must have the completed original form.

♦ Tetanus and Diphtheria- (Tdap or Td) show proof of vaccination within 10 years.

♦ Second Year Physical- Does NOT require repeat blood titers for measles, mumps, rubella, and varicella.

♦ Blue Slips—will only be given when ALL requirements are met for the physical exam (Incomplete health forms will be returned for completion).

♦ Copies– You will need copies of your physical, vaccine records, and all lab reports for all of your clinical affiliations. It is very important to make several copies to keep for yourself before handing your physical into the NCC Student Health Office.
